

underpinning FOSSBot, combined with partners' continued commitment to reuse the project's results and develop follow-up initiatives, provides strong evidence that the impact of STEPS will continue well beyond the official end of the project.

Partners also agreed that the follow-up evidence collection launched after TPM6 will further strengthen the Final Report by consolidating additional dissemination evidence, exploitation examples, sustainability commitments and impact indicators identified during the meeting.

Follow-up evidence collection

To support the preparation of the Final Report, partners agreed to complete a short follow-up questionnaire **by 20 July 2026**: [S.T.E.P.S. Final meeting form — Follow up – Fill out form](#)

The questionnaire aims to consolidate additional evidence related to dissemination, exploitation, sustainability, project management and long-term impact that was identified during TPM6 but could not be fully documented during the meeting
